

ADDITION TO THE RENOVA  
BATHROOM SERIES

# PERFECTLY ROUNDED OFF

The classic Renova bathroom series from Geberit is being expanded with the addition of a modern, round washbasin and other items to the comprehensive product portfolio.

With this step, the successful bathroom series is now being supplemented by products with a contemporary look. The new products are also a very attractive proposition in project business and further enhance the visual appeal of Geberit's basic line, which has been on the market for the past 34 years.

#### A WASHBASIN WITH NO CORNERS OR EDGES

The new Renova washbasin is modern, has a beautiful design and leaves a high-quality impression. It has an ample shelf surface as the tap hole bench is not lowered. The new straight sides of the ceramic sanitary appliance connects flush with the wall and offers a modern look. The trap can be elegantly concealed behind a ceramic half pedestal. The basin and tap are easy to install and, thanks to the special KeraTect® glaze, also easy to clean. The 60 and 65 cm washbasins have an impressive load-bearing capacity of 300 kg. The washbasin is available in four widths of 55 to 70 cm and also as a handrinse basin in three sizes.

#### ERGONOMICALLY SHAPED AND WITH AN OPTIMAL FIT

From April 2020, the Renova and Renova Plan bathroom series will also each feature a new bathtub made of sanitary acrylic. Highlights here include the following:

- ergonomically shaped back on the Renova model
- possibility of choosing between seven different sizes in order to tailor the bathtub to different bathroom spaces and body sizes, thus guaranteeing an optimal fit
- the long, wide and flat bathtub floors, thus providing a safe, comfortable shower surface on both bathtubs
- a rim at the foot of the bath that acts as both a spacious shelf surface and also as space for the tap

From a technical viewpoint, the new, patented telescopic foot set for adjusting the height of the bathtub is an intriguing proposition. This simplifies installation thanks to the wide adjustment range.

→  
The new, modern design of the Renova washbasin can best be seen from above – among other aspects, the tap hole bench is no longer lowered and the side guide connects flush with the wall.

→  
The subtle lines on the back of the Renova bathtub emphasise the ergonomic shape of the tub.

#### NEW ADDITIONS TO THE RANGE

- A round washbasin with optimised design in different sizes
- A wall-hung WC in the Renova Compact range with a round, shrouded design
- Renova bathtub with an ergonomically shaped back
- Renova Plan bathtub in a linear design

All new products are available from April 2020.

An elegant pair – the integrated washbasin with particularly narrow rim combined with the Geberit Selnova Square washbasin cabinet.

SELNOVA BATHROOM SERIES

# NEW ADDITIONS

The Geberit Selnova bathroom series is being expanded significantly, thus ensuring the right solution is available for any requirement. The focus here is on a modern furniture range in a wider selection of colours and a comprehensive portfolio of rim toilets – both floor-standing and wall-hung – in a timeless design. Also brand new are the compact toilets and washbasins in the Selnova Compact range.

Selnova has a classically timeless design and offers the right products for all tastes. The bathroom series sets itself apart with its outstanding value for money and the uncompromisingly high quality that has become synonymous with Geberit. The new Geberit Selnova portfolio will be available from April 2020.

#### THE RIGHT MODEL FOR ALL CUSTOMER WISHES

The washbasins and toilets from the Geberit Selnova bathroom series are available in two different designs. Geberit Selnova has a round, organic design whilst Geberit Selnova Square is – as the name suggests – angular. The toilets are available as floor-standing and wall-hung versions, both in shrouded or semi-shrouded design. Models with or without flush rim are available, as are compact versions in the Selnova Comfort range.

#### 20 NEW COMPACT MODELS

Selnova is now also available in compact form, meaning the ceramic sanitary appliances have a smaller projection. For the first time, the product range for 2020 includes 20 compact models in a timeless design for small bathrooms and guest WCs. The Selnova Compact range also includes two wall-hung Rimfree® toilets, two wall-hung bidets and 14 washbasins in widths of 40 to 65 cm.

#### EXPANDED FURNITURE CONCEPT

The existing furniture concept remains and has been added to as follows. New washbasin cabinets in a modern design are now available, featuring doors and drawers with soft closing in widths of 55, 60, 80 and 100 cm. These can be combined with a washbasin with a particularly narrow rim to form a high-quality ensemble consisting of furniture and ceramic sanitary appliance. In addition to the existing white high-gloss coated version, the range of colours has been expanded to include lava matt and a light and dark walnut design. Storage boxes are optionally available for the drawers. A modular, combinable low cabinet in two heights also offers added storage possibilities. The range is rounded off by two mirror cabinets with optional light.
